ENGINEERING & CONSTRUCTION CONTRACTING ASSOCIATION

Performance Monitoring and Metrics

Bill Barger
President, APS/APSolutions LLC

Introduction

- **This is an interactive session, with a fundamental goal to:**
 - Give everyone a chance to participate (hence “interactive”)
 - Provide each of you with at least one takeaway
- **The topic is on using performance metrics**
 - Focused on discussing metrics that aid future performance, not track past performance

Introduction

- **Format is to provide discussions in Roundtable**
 - Develop and discuss suggestions for predictive metrics (leading indicators) across three themes: Risk, Team Effectiveness, and Productivity
 - Table moderator leads introductions and discussions of relevant predictive metrics that you have used, their value, and challenges to implementing a monitoring program (30 minutes)

Introduction

- **Format is to provide discussions in Roundtable**
 - Report out from major themes with ONE major observation from each group
 - Compilation of the groups' findings will be provided to you via e-mail
- **So, before we get started: What is an example of a predictive metric?**
 - Safety, brought to you by Bob Allbright
