

ECC + BRIDGES TO PROSPERITY WE'RE BUILDING A PARTNERSHIP WITH PURPOSE

Bridges to Prosperity

Bridges create connection.

An estimated 1 billion people around the world lack safe transportation access to essential services. Bridges to Prosperity [B2P] designs, builds, and maintains durable and environmentally sustainable bridges to connect the rural last mile to the rest of the world.

Together we're taking it a step further.

The newly formed, long-term partnership with ECC and B2P will focus on STEM related goals that will help advance craft labor development and influence the talent pipeline within the Engineering and Construction industry.

STEM

- Work with engineering & technical schools in the countries they work to build knowledge and skills.
- Through B2P's Corporate Program, US and European engineers and contractors get hands on experience broadening soft skills to bring back to their companies.

TALENT PIPELINE INFLUENCE

- The B2P Corporate Program engages companies throughout the Engineering and Construction industry, allowing staff to directly support B2P projects.
- Several B2P partners advertise this partnership during interviews and in their job fairs.

INFLUENCE ON CRAFT LABOR

- B2P hires and trains local skilled and unskilled labor so that by the end of the project a labor force has been trained in basic masonry and steel work. They become better prepared to accept roles in the construction field in their country.
- B2P projects uses the highest standards of craft labor in the US. They work to ensure safe and quality practices are followed.

Learn more about this partnership at our upcoming virtual conference or on our website.
